

Condair's OEM Services

Designing innovative humidification and evaporative cooling solutions for Original Equipment Manufacturers globally.

About Condair

Condair has been a world leader in state-of-the-art humidification and evaporative cooling technology for over 70 years. The company draws upon its extensive experience to develop an ever growing range of products manufactured to stringent ISO 9001:2015 certified quality standards. These standards allow us to provide our customers with maximum reliability, minimum maintenance and a choice of energy sources.

The OEM Team

Condair's OEM team is comprised of humidification and evaporative cooling experts that are able to assist you in selecting the perfect solution for your facility. Our team is also able to calculate cost savings for energy efficient solutions, provide water treatment options, and provide installation and service options if required. Our OEM team is one stop for all your humidification and evaporative cooling needs.

Why Humidify

The humidity inside your building has a direct impact on the people, property, and processes inside this space. The importance of humidity is so significant that clear directives exist in many countries for the operation and maintenance of humidification systems.

It is also scientifically proven that low humidity levels can have a negative impact on human health if straying from the narrowly defined humidity range between 40–60%. These values are often difficult to maintain under day-to-day conditions. This is why we provide a comprehensive range of humidification systems embodying a variety of technologies to ensure optimal air humidification in every situation.

Condair Humidifiers & Evaporative Coolers

When you choose Condair products, you are choosing a company that has built a reputation for superior quality humidification and evaporative cooling systems. Condair is also the only humidifier company to manufacture a complete range of solutions including electric steam, high pressure, evaporative media, direct steam injection, steam exchance, gas fired, and direct room technologies. Below is an overivew of some of our technologies.

MES Series

Electrode Steam Humidifier

The MES2 produces pure, uncontaminated moisture with minimal maintenance and it uses 5 times less water than other technologies.

RS Series

Resistive Steam Humidifier

The RS has a patented scale management system that removes the separated scale during operation resulting in easy cleaning & maintenance.

GS Series

Gas Steam Humidifier

The GS provides clean atmospheric steam with economical operation, simplified maintenance and reliable performance.

DL Series

Hybrid Humidifier

The DL combines both atomizing and evaporative technologies that delivers hygiene, performance, and cost-effectiveness.

ME Series

Evaporative Media Humidifier / Cooler

The ME is an efficient way to provide both humidification and cooling DEC/IDEC while reducing building energy usage.

AM Series

Short Absorption Manifold

The AM SAM-e steam absorption system is for use in air handling units and duct systems where short steam absorption distance is critical.

Condair OEM Services

Designing humidification and evaporative cooling solutions for internal use in specialty air handling equipment.

OEM Applications

Condair's humidification and evaporative cooling technologies improve productivity in many industries such as:

- Data Centers
- Cold Storage
- Green Buildings
- Hospitals & Health Care
- Food Manufacturing
- Electronic & Semi-Conductor
- Hot Yoga & Spa Wellness
- Laboratories & Clean Rooms
- Printing / Packaging
- Cannabis Growing Facilities
- Pharmaceuticals
- Automotive & Paint Booths

References

Condair's OEM team has been integral in many successful humidification and evaporative cooling projects around the world.
