

Data-Driven Selection for Optimal Humidification

Humidification, Dehumidification
and Evaporative Cooling

A New Way to Select a Humidifier

Choosing the right humidifier should be simple and informed. With Condair EcoPro, we've revolutionized the way businesses select humidity control systems—by putting data, cost savings, and performance at the forefront of decision making.

Whether you're working with a healthcare facility, manufacturing plant, or office building, Condair EcoPro uses your site-specific conditions to simulate how different humidifiers will perform over time. That means you get comprehensive insights into which solution will optimize comfort, save energy, and cut operating costs.

Discover Condair EcoPro

Condair EcoPro is an advanced calculation tool used by Condair representatives to support Engineers, Energy Consultants and Building Professionals.

By inputting your facility's data—such as location, energy costs, building size, HVAC systems, and occupancy levels—Condair EcoPro will simulate performance across multiple humidifier models, taking the guesswork out of humidifier selection. You'll receive a comprehensive, data-driven analysis comparing energy use, cost of ownership, and long-term savings, helping you choose the right system with confidence.

Why Select with Condair EcoPro

Condair EcoPro is the smartest selection tool on the market for choosing a humidification system—Designed by Condair’s humidity control experts. With Condair EcoPro, you can expect:

- Custom analysis and data-backed recommendations based on your facility’s specs and usage patterns.
- Side-by-side comparisons of Condair products by features, benefits, water use, energy efficiency, and operating costs.
- Transparent total cost of ownership to help you understand long-term savings, opportunities for rebates and incentives, and return on investment.
- Additional insights into potential energy savings from adiabatic cooling

Where Condair EcoPro Makes All the Difference

Condair EcoPro is designed for Engineers, Energy Consultants, and Building Professionals who need clarity when specifying humidification systems. Ask your Condair representative for a Condair EcoPro analysis when:

- Planning a new build or major retrofit
- Evaluating multiple product options for cost and sustainability
- Justifying your recommendation with data-backed report that shows costs and usage
- Applying for energy incentives or rebates

Access personalized product comparisons, transparent lifecycle costing and key efficiency & sustainability insights

About Condair

Condair EcoPro is the latest innovation from Condair, the global leader in commercial humidification with over 75 years of industry expertise. With manufacturing across Europe and North America, and a strong presence in commercial and industrial markets worldwide, Condair brings trusted performance and global insight to every solution. We're proud to help facilities like yours make smarter, more sustainable decisions.

Ready to see what Condair EcoPro recommends for your space?

Let's find the most economical and efficient humidifier for your facility.
