

QUICK INSTALL GUIDE FOR PROFESSIONALS

Condair HumiLife Whole-home Steam Humidifier Condair RH

Humidification and Evaporative Cooling

Thank you for choosing Condair

Cautions and Warnings

CAUTION: Servicing

- The unit is mains powered. Disconnect main power before any servicing.
- Electrical compartment contains high voltage components. Access should be limited to authorized personnel only.
- The unit is hot. Wait for the unit to drain and cool before servicing. During and following operation of the humidifier, the steam and components in contact with the steam such as the steam lines, steam distributors, and condensate lines can become hot and can burn if touched.
- Condair does not accept any liability for installations of humidity equipment installed by unqualified personnel, or the use of parts, components, or equipment that are not authorized or approved by Condair.

CAUTION: Electrical

- All electrical work should be done according to all applicable local and national codes.
- Electrical connection to be performed by a licensed electrician.

CAUTION: Plumbing

- (Recommended) Plumbing to be performed by a licensed plumber.
- Drain water from the humidifier can be very hot. Drain to an appropriate floor drain.
- All plumbing work should be done according to local plumbing code.

\triangle

CAUTION: Installation

- **Do NOT** mount in area where freezing can occur.
- Do NOT mount on vibrating surface.
- Do NOT mount on the floor.
- Do NOT block the steam outlet.
- (Recommended) Install an air proving switch.
- Do install steam lines to prevent any restrictions that may cause back-pressure in the humidifier.
- Ensure furnace fan is operating while the humidifier is generating steam.
- Keep out of reach of children.

What's in the box?

- Condair HumiLife Steam Humidifier
- Quick Start Guide
- Steam Distributor & Gasket
- Humidity sensor (duct)
- Water (fill) hose, 20 ft (6 m)
- Steam hose, 5 ft (1.5 m)
- Drain hose, 10 ft (3 m)
- Fittings

Accessing the Condair RH manuals

To access all Condair RH manuals, including the French manuals, please scan the QR Code below.

What you'll need

Condair HumiLife App. Find the Condair HumiLife App in the App Store® (iPhone) or Google Play Store (Android). (required to finalize the installation)

Google Play (Android)

App Store (iOS)

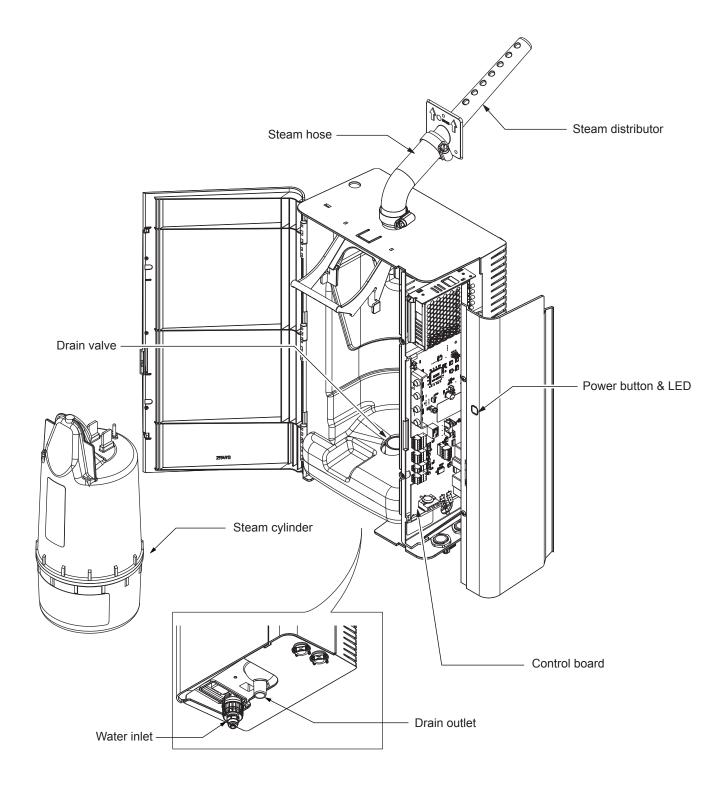

Access to:

- Drain
- Water supply
- Forced air ventilation system
- Wall studs (for wall mounted installations)

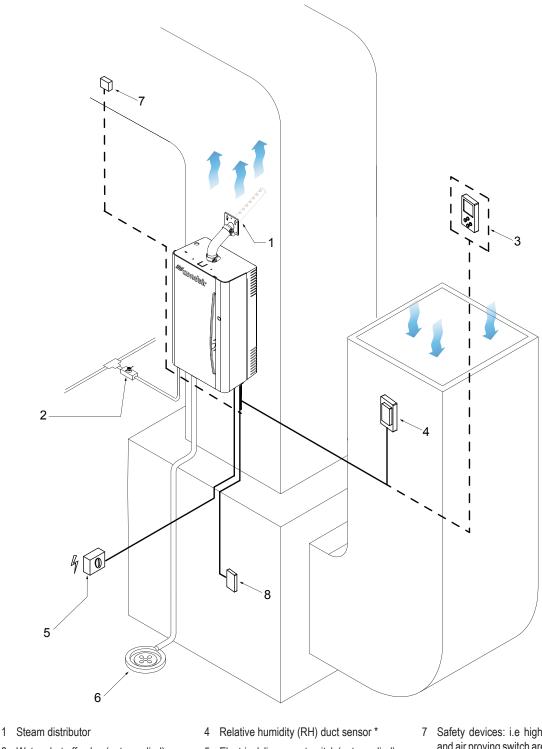

Tools:

- Phillips (+) screwdriver
- Flat-head (–) screwdriver
- Pliers
- Level
- Hole saw, 1.2 in (30 mm) & 5/8 in (16 mm)
- Drill and bits
- Box cutter (or other sharp knife)
- Wire cutter and wire stripper

Product Overview

Installation Overview (Furnace)

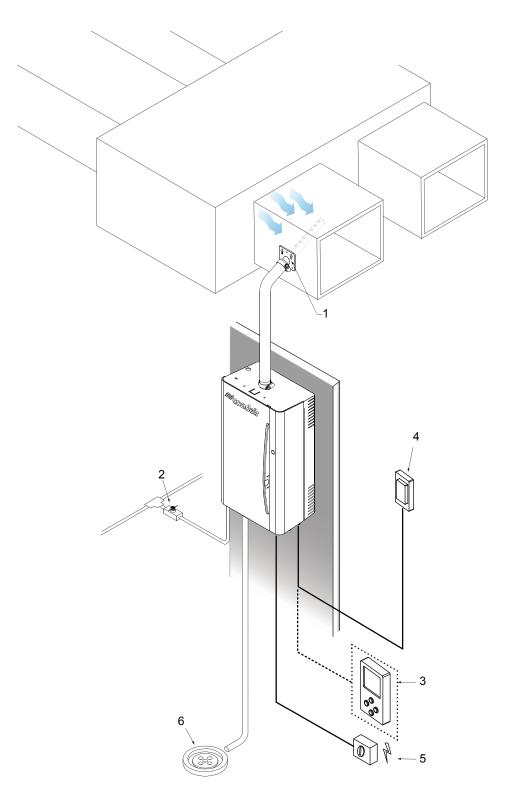

- 2 Water shut off valve (not supplied)
- 3 On/Off wall humidistat * 6
- supplied) 5 Electrical disconnect switch (not supplied)
 - 6 Drain (not supplied)

- 7 Safety devices: i.e high limit humidistat and air proving switch are recommended, installed in series on Terminal X3 (both not supplied)
- 8 Fan enable/activation

* only an on/off humidistat (not supplied) OR RH sensor (supplied) should be installed.

Note: It is recommended to install a high limit humidistat and an air proving switch for safety. The high limit humidistat can be ordered under PN# 2597935 and the air proving switch under PN# 2598427.

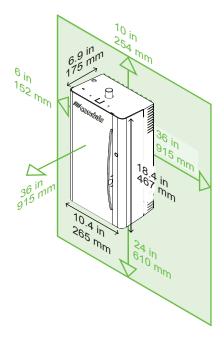

Installation Overview (HRV)

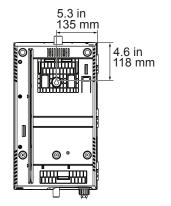

1 Steam distributor

- 3 On/Off wall humidistat *
- 2 Water shut off valve (not supplied)
- 4 Relative humidity (RH) duct sensor *
- 5 Electrical disconnect switch (not supplied)
- 6 Drain (not supplied)
- * only an on/off humidistat (not supplied) OR RH sensor (supplied) should be installed.

Location and Clearances

The Condair HumiLife RH may be installed on a wall and remotely connect to your ventilation system, or directly onto the ventilation duct.

When choosing the location for your humidifier, ensure there is enough clearance for servicing and maintenance, and for the installation of the steam line and steam distributor.

For remote installations, you will require a longer steam hose, so consider the steam line recommendations below for efficient humidification.

For installations on a wall, mount the unit on wall studs (2x4 or equivalent).

For installations directly on the duct, use the mounting template (supplied) to locate pilot holes for mounting the unit and installing the steam distributor.

(Recommended) Install the distributor first. The location of the distributor will define the location of the humidifier.

Net / Full Weight	Dimensions HxWxD
Ib (kg)	in (mm)
19 / 26 lb (8.6 / 11.8 kg)	18.4 x 10.4 x 6.9 in (467 x 265 x 175 mm)

Clearance dimensions shown are for reference only and are the minimum required for maintenance of the humidifier. Consult local and national code before final location and installation.

Condair does not accept responsibility for installation code violations.

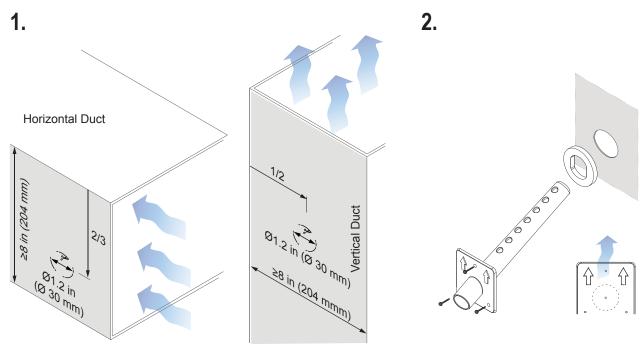

Important Considerations for the Steam Line

- Install the humidifier below the steam distributor.
- Install support brackets (one supplied with the humidifier) to prevent sagging in the steam line. If sagging occurs, use additional support brackets.
- Install the humidifier as close as possible to the steam distributor. Short distances minimize condensate losses and reduces the possibility of back pressure in the steam line.
- Bend radius: 6 in (150 mm) minimum.
- Length: 15 ft (4.5 m) maximum.
- Slope: 15° min. (up-slope), 2° max. (down-slope).

Note: install condensate traps at low points if the steam line has any down-slope.

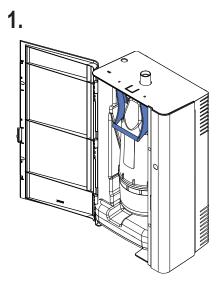

- Steam line material: Condair steam hose (supplied), or properly insulated stainless steel or copper, with max. surface temperature at 140 ° F (60 °C).
- Clamp torque: 12 in-lb (1.36 Nm) (max. at humidifier outlet).

Installing the Steam Distributor

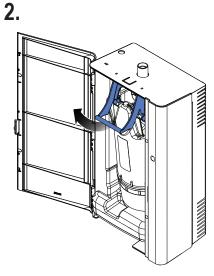

Create a 1.18 in (30 mm) hole in the duct. Install distributor on the supply duct, after the cooling coil, and before any bends or obstructions. For horizontal ducts, cut the hole at roughly 2/3 of duct height, from the top. For vertical ducts, cut the hole halfway between the two sides of the duct. Place a gasket over the steam distributor and insert the distributor into the duct. Ensure that the arrows on the distributor are pointing up. Secure the distributor to the duct with self-tapping screws.

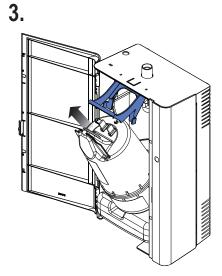

Removing the Steam Cylinder

Open the door to the humidifier.

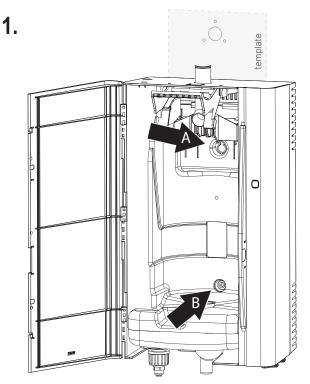

Pull the lever upwards. The lever will push the cylinder out.

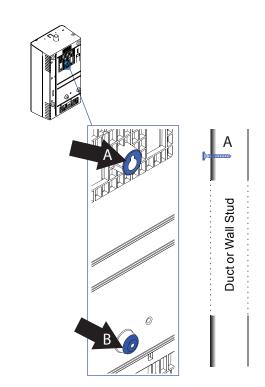

Pull the cylinder out of the humidifier.

Mounting Your Humidifier

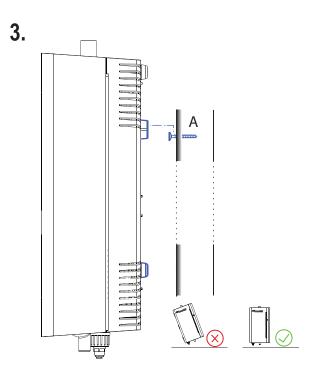

Open the door to the humidifier. Remove the steam cylinder if it is installed.

Tip: For installations directly on the duct, place the mounting template on the duct and secure with tape. The template will show you where to cut a hole for the distributor.

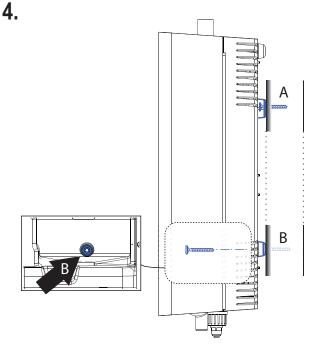

2.

On the wall stud (2x4 or equivalent) or duct, mark the location for the key hole A (on the back of the humidifier). Insert a screw at A. Leave space on the screw to hang the humidifier.

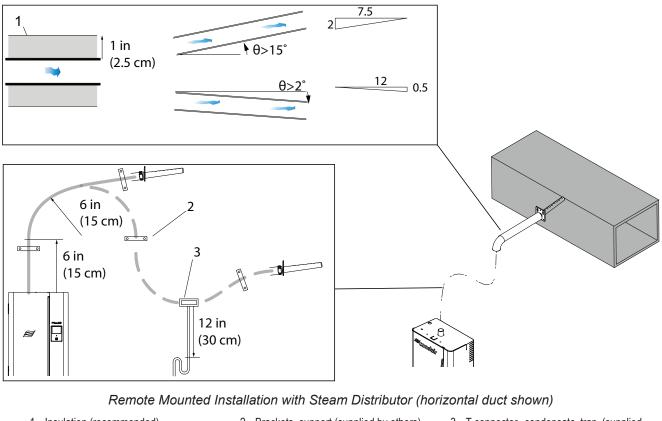

Raise and hang the humidifier on the screw A. Ensure the unit is level.

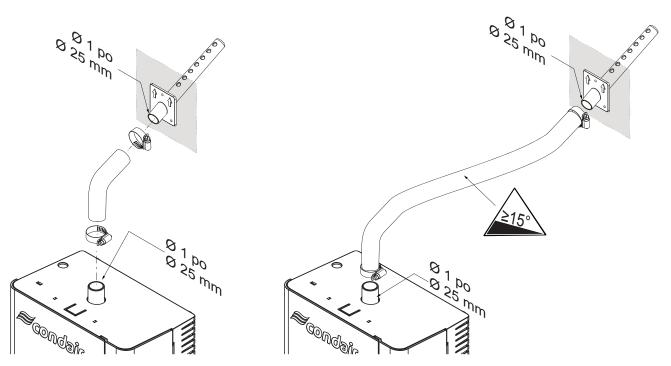

Through the inside of the humidifier, insert and tighten a screw into the lower mounting hole B. Tighten the top screw at A.

Installing the Steam Line

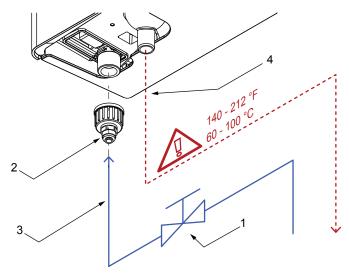

- 1 Insulation (recommended)
- 2 Brackets, support (supplied by others)
- 3 T-connector, condensate trap (supplied by others)

Installation de la conduite et du distributeur de vapeur

Water Supply and Drain Connections

Water Supply and Drain Connection

- 1 Water shut off valve
- 3 Inlet water line, 1/4 in (6.4 mm) (supplied)
- 4 Drain line, 3/4 in (20 mm) I.D. (supplied)

2 Inlet, quick connect (supplied)

Water Supply Requirements

Quality	Potable water (do not use reverse osmosis or deionized water)
Pressure	30 - 80 psig (2 - 5.5 bar)
Temperature	39 - 86 °F (4 - 30 °C), cold water
Conductivity	125 - 1250 μS/cm
Other	Water shut-off valve installed before the humidifier (for service).
	Installed according to national and local plumbing code.

Drain Requirements

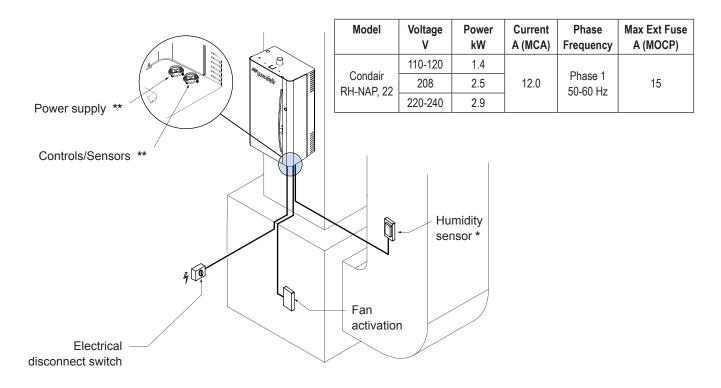

The Condair HumiLife RH produces hot water during operation. Upon normal drainage, the drain water is automatically cooled to 140 °F (60 °C).

IMPORTANT! Drain water may reach high temperatures 212 °F (100 °C) in cases where the supply water is not cold, or obstructed.

Considerations for the drain connection

- Ensure that drain line is made of a material rated to handle hot temperatures, 212 °F (100 °C).
- (Recommended) Use the drain line hose supplied with the humidifier. For longer runs, use copper pipe with the same inner diameter as the drain line hose supplied with the humidifier, inner diameter: 3/4 in (20 mm).
- Ensure that the internal diameter throughout the drain line is constant.
- Ensure that the drain line is adequately sized. A restricted drain line may result in higher mineral concentrations in the water and can result in poor performance.
- Ensure that the drain line is routed to a floor drain (or where plumbing codes permit). If the drain is far from the humidifier, use a condensate pump rated for hot drain water.
- Ensure that the drain line has a consistent, downward slope (1.2°) to the drain.

Installing the Electrical Connection and Controls

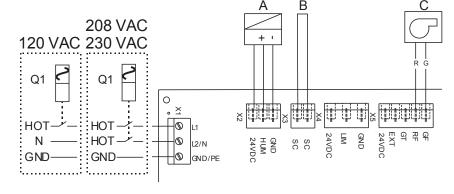

* for other control devices, refer to installation manual.

** route cables and wires though strain relief clamps.

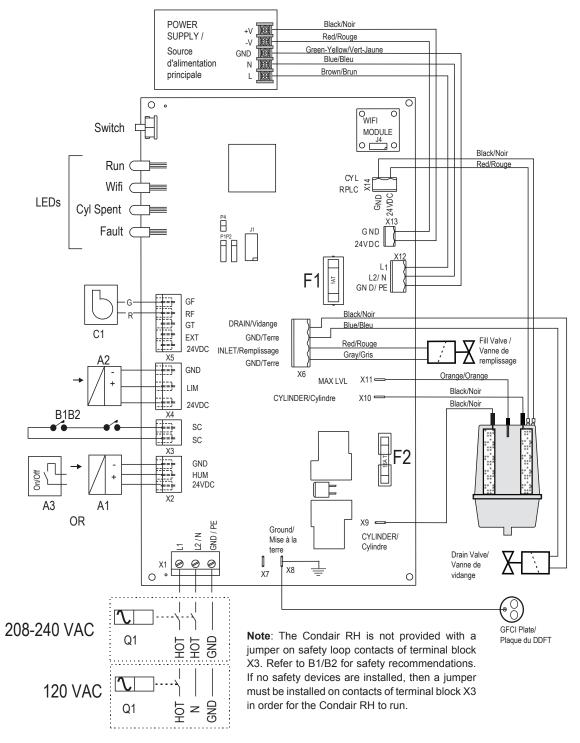

- **B**: Jumper (refer to installation manual for more information)
- C: Fan activation, connect to HVAC system
- Q1: External disconnect or breaker

Consult the Installation Manual for electrical connection requirements and guidelines.

Electrical – Wiring Diagram

Wiring Diagram

- A1 Humidity control sensor or controller (Install either A1 or A3)
- A2 High limit control sensor or controller (highly recommended)
- A3 Humidistat (On/Off). Install either A1 or A3
- B1/B2 Air proving switche, safety high limit humidistat, or external contact. Jumper, use if air proving switch or furnace fan not installed.
- C1 Fan activation, connect to HVAC system
- F1 Fuse 1AT (5x20 mm)
- F2 Fuse 16AT, SPT (5x20 mm)
- Q1 External disconnect or breaker

Different Humilife RH Configurations

Configuration 1: Contractor App Setup, No-WiFi Connection, External/Demand Controls

- The humidifier will operate according to the external controls
- The user will control the humidifier from the external controls
- The user will need to check the humidifier periodically to identify if the cylinder needs to be changed (Yellow Light)
- The cold-weather setback feature is unavailable (requires WiFi)

Configuration 2: Contractor App Setup, No-WiFi Connection, Sensor Controls

- The humidifier will operate according to the sensor signal and the default setpoint 40 % Relative humidity
- The user will not have control over the humidity
- The user will need to check the humidifier periodically to identify if the cylinder needs to be changed (yellow light)
- The cold-weather setback feature is unavailable (requires WiFi)

Configuration 3: WiFi Connection, External/Demand Controls

- · The humidifier will operate according to the external controls
- · The user will control the humidifier from the external controls
- The user will receive notifications via the Condair HumiLife App when the cylinder change is needed
- All features are available to the user (Note: Sensor settings must be changed if the homeowner wants to control the unit through the Condair HumiLife App instead)

Configuration 4: WiFi Connection, Sensor Controls

- The humidifier will operate according to the sensor controls
- The user will control the humidifier from the Condair HumiLife App
- The user will receive notifications via the Condair HumiLife App when the cylinder change is needed
- All features are available to the user

Operation Summary Table

To turn On/Off the humidifier:	Press the power button for 2 seconds.
To reset the error/warning:	Press and hold the power button for 3 seconds.
To connect the unit to your device:	Press and hold the power button until the WiFi LED flashes green (around 5 seconds)

Download Condair HumiLife App

Download the Condair HumiLife App either from the "Google Play Store" or the "Apple App Store". The Condair HumiLife App can be found by searching "Condair HumiLife" or by using the following QR codes:

Commissioning with Condair HumiLife App in Professional Mode (for contractors/installers for quick connect and configuration)

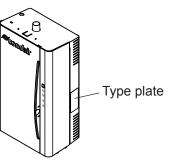

Go to "Settings" on your mobile phone and activate the WLAN function.

Start the Condair HumiLife App on your mobile device.

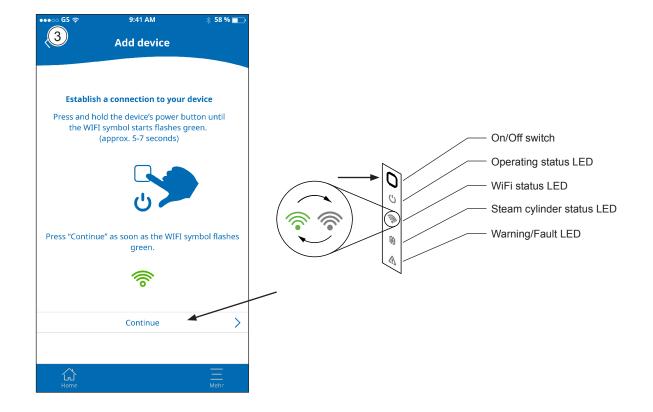

For contractors/installers: Enter **username "RH"** and login **without a password**. This will allow the installer to access and modify the settings only – This will not connect the unit to WiFi or the cloud).

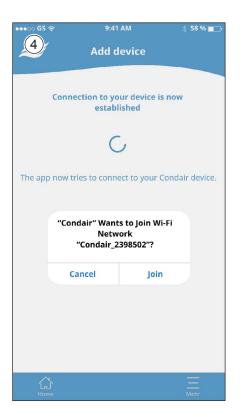

Enter Serial Number of device. You can find the serial number on the type plate. The type plate is located on the right side of the device, as indicated below.

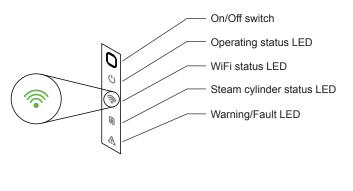

The serial number has the format 2XXXXXX.

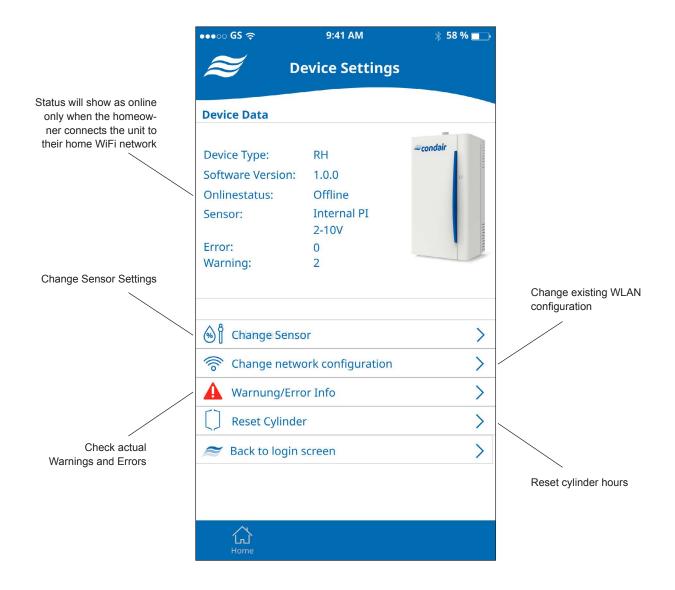

The operating system is asking you if you want to join the network with Condair_Serial number. If the number is correct, confirm by pressing <Join>.

Select your local WiFi network and press "Connect".

Note: in case your WiFi signal is not listed, then select "My WLAN is not listed" and enter it manually.

Note: If the WiFi Symbol of your your local WiFi network is red, signal strength is low which can lead to unstable connection.

To improve WiFi signal strength, relocate the WiFi Router or place a repeter between the unit and the device.

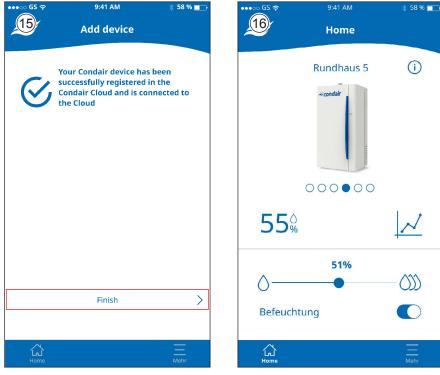

Enter you local WiFi network password (make sure it is entered correctly), then press on "Save and connect".

After completing the network configuration, select "Continue".

Wait for few seconds for the Condair HumiLife App to receive a confirmation from the device.

Once confirmation is successful, wait for a few seconds for the Condair HumiLifeApp to connect to the cloud.

Successfully connected to the cloud, select "Finish" to proceed. The WiFi LED on unit should now change to solid Blue.

The Home screen is shown. Select "More" for more options (WiFi symbol on unit should be solid blue).

Note: When deciding where to install the unit, please make sure the unit is installed close enough to the WiFi router to receive proper WiFi signal. If this is not possible, a "Repeater" or a "Signal booster" may be required. Contact your internet provider for more information.

Temperature Setback Feature

The Temperature Setback Feature will allow the homeowner to set their humidifiers location. The feature will work similar to an outdoor temperature sensor, but the temperature is from the online weather data. To set your location, the Zip Code / Postal Code is sufficient to be entered.

Disclaimer

This Quick Start Guide (the "QSG") provides basic product and installation overview of the Condair HumiLife Humidifier (the "HumiLife Humidifier") and is for general information purposes only. The general installation guidelines contained herein do not purport to cover all details of the HumiLife Humidifier nor do they provide for every contingency met in connection with installation. Please consult the complete Installation Manual and Operation Manual for a more comprehensive installation guide and for general operation, maintenance, and troubleshooting information, including Condair's suggested storage, packaging, and transportation guidelines. The Installation Manual and Operation Manual contain specific system, accessories, and components. Copies of the complete Installation Manual and Operation Manual can be found at: www.condair.com/residential . Please read all Cautions and Warnings before installing and using the HumiLife Humidifier.

All electrical connections must be installed in accordance with local and national electrical code requirements by a licensed electrician.

All water supply and drain line connections must be installed in accordance with local plumbing codes by a licensed plumber.

Condair does not accept any liability for installations of humidity equipment installed by unqualified personnel or the use of parts/components/equipment that are not authorized or approved by Condair.

Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- · Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warranty

Condair Inc. or Condair Ltd. (depending on the entity that supplied the product, and hereinafter collectively referred to as CONDAIR) warrant for a period of two years after installation or 30 months from the manufacturer's ship date, whichever date is earlier, that CONDAIR's manufactured and assembled products, not otherwise expressly warranted, are free from defects in materials and workmanship. Notwithstanding the foregoing, the products listed below have an alternate warranty period:

- GS/GSTC Series heat exchanger(s) are warranted to be free from defects in materials and workmanship for a period of 3 years from installation or 40 months from the manufacturer's ship date, whichever is earlier.
- SAM-e Short Absorption Manifolds, except for the coupling seals, are warranted to be free from defects in materials and workmanship for a total period of 10 years from the manufacturer's ship date.
- Humilife RH, RH2+ and WH humidifiers are warranted to be free from defects in materials and workmanship for a period of 5 years from the manufacturer's ship date. CONDAIR may, at its discretion, replace individual components or Humilife RH units as a whole.
- Spare Parts used for repairs are warranted for the balance of the term of the warranty on the original humidifier or 90 days, whichever is longer.
- No warranty is made against corrosion, deterioration, or suitability of substituted materials used as a result of compliance with government regulations.

CONDAIR's obligations and liabilities under this warranty are limited to furnishing replacement parts to the customer, F.O.B. CONDAIR's factory. The replacement parts are warranted for the balance of the term of the warranty on the original humidifier or 90 days, whichever is longer. Procedure:

- 1. Customer Requests Warranty as per instructions on the CONDAIR Warranty Form.
- 2. CONDAIR reviews the warranty claim and will respond in one of two ways:
 - a. Warranty Accepted Replacement Part or credit granted.
 - b. Warranty Declined Response with justification will be provided to the customer.
- 3. In some cases, CONDAIR may request the part to be returned, freight prepaid by the customer, as part of the warranty acceptance or warranty determination process. Some reasons include:
 - a. Part must be analyzed to determine the root cause of failure.
 - b. Part must be returned to the supplier for claim/investigation.

When parts are requested to be returned, replacement parts will be sent by CONDAIR to the customer against an invoice from CONDAIR paid by the customer. The cost of the replacement parts will be reimbursed to the customer with a credit note after the parts are received and analyzed by CONDAIR, if the warranty is accepted.

The warranties set forth herein are in lieu of all other warranties expressed or implied by law. No liability whatsoever shall be attached to CONDAIR until said products have been paid for in full and then said liability shall be limited to the original purchase price for the product. Any further warranty, with the exception of a purchased extended warranty described below, must be in writing, and signed by an officer of CONDAIR.

CONDAIR makes no warranty and assumes no liability unless the equipment is installed in strict accordance with the installation manual in effect at the date of purchase, and by properly qualified and licensed professionals capable of installing such equipment.

CONDAIR makes no warranty and assumes no liability whatsoever for consequential damage or damage resulting directly from misapplication, incorrect sizing, or lack of proper maintenance of the equipment.

CONDAIR makes no warranty and assumes no liability whatsoever for damage to the products, humidifier, supply lines, drain lines, steam distribution systems, or the building as a whole caused by freezing.

CONDAIR reserves the right to change the design, specifications, and performance criteria of its products without notice or obligation.

Extended Warranty

Extended warranties are available to purchase under the conditions listed above. Extended warranties must be purchased at the time of the original equipment order.
